## Dear Delegate

It gives us great pleasure to welcome you to the Society's tenth annual scientific meeting, workshop and study day. The Society's multidisciplinary structure is open to all practitioners working in the field of obstetric and gynaecological imaging and the importance of the contribution of sonographers and radiology trainees is reflected through representation on its committee.

In a change to our normal programme, this year's meeting will consist of the scientific meeting on day 1 and a Trainee Workshop and Gynaecological Study Day on day 2. There will be separate streams for Allied Healthcare Professionals and those people requiring practical training. Delegates are welcome to register for both days, or choose a day that suits their practice.

Once again, we are delighted to have so many oral presentations and posters on different aspects of practice and research in the field of ultrasound. The meeting will be suitable for practitioners taking part in continued professional development programmes and there will be ample time for discussion, debate and networking.

We look forward to welcoming you to our comprehensive programme dedicated to the setting and maintenance of the highest quality standards of practice in the field of obstetric and gynaecological ultrasound.
